Raven is a versatile photographer who works in fine art photography: landscapes, still life's, nature and abstract. She also applies her photography and graphic design to the fashion field with VIDA. She is also the author of four books available at Barnes and Noble.com.

Raven was born in Arkansas and grew up in Oklahoma. Educated as an Audio Engineer and holding several various technical certificates. She has traveled extensively throughout the United States with her husband in the last thirteen years. She has made her home in the Colorado rocky mountains. Her traveling and life experiences has let to the development of her signature artistic theme: "Life = Emotion".

She has a shoot-from-the-hip technique with a strong eye for composition.

In June of 2013, she unexpectedly ended up with a viral and bacterial infection of her heart that caused multi-organ failure. She was in ICU for six weeks recovering. These infections destroyed part of her heart leaving it weakened.

Most of her accomplishments in art photography, graphic design and authoring of books has occurred since her recovery as she has thrown herself into her work. Her love of life since this experience has enhanced her arts and photography.

She captures the essence, that a moment of life is not to be wasted and that every experience is precious. She conveys this within each of her pieces. This is truly one of many emotions that you will experience from her work.

Raven Marie Robins (Deel)
Independent Fine Art Photographer &
Graphic Designer
